“Women’s Digital Center”

The **Educational Advising Center** announces the finalists of the grant competition within the project **Women's Digital Center**, organized with full financial support of **Orange Moldova** and **ATIC**, within the Tekwill Project, financed by the United States Agency for International Development (USAID) and Sweden.

The digital and entrepreneurial education project – for women ranging 18-45 years old from the Republic of Moldova – is meant to set up, within the 3 NGOs from the regions of the country, a special space dedicated to digital and professional training for the women participating in the project, so that, as a result of this initiative, they will be able to launch/manage and promote a small business.

The 3 NGOs were selected, on a competition basis, in order to get the grant relevant to the educational activity.

During this year's edition, applications from **9** non-governmental organizations, located in **6** regional localities of the country (3 - Comrat; 2 - Balti; 1 - Edinet; 1 - Ocnita; 1 - Tiraspol; 1 - Vulcanesti), were submitted for the competition. As a result of the application forms' evaluation by the Independent Commission of Experts, as well as of the study visits to the pre-selected nongovernmental organizations, the decision was made in favor of **3** finalist NGOs, which, during 7 months, will carry out the project in the given community.

The complete list of finalists is available at: www.eac.md
